## GENERAL INTERESTS

30 years of experience in programming and M.Sc. in software engineering. Specialized in model development for machine learning. Ph.D. from the topic of neural network language models. Worked on various vision, language, and speech tasks for 20 years. Developed neural network models using PyTorch, TensorFlow, and Theano during the last ten years.

My work has involved running experiments, implementing code for training models, and optimizing multi-GPU training. I'm keen to write aesthetic and maintainable code. I want to challenge myself, constantly learn, and stay on top of the research field. I'm motivated by contributing to open source projects and I've also authored several scientific publications.

## EDUCATION

**Aalto University School of Electrical Engineering,**  
Department of Signal Processing and Acoustics,  
Espoo, Finland

*Doctor of Science (Technology)* September 2012 to May 2018

- Research Field: *Speech and Language Technology*
- Thesis: *Modeling Conversational Finnish for Automatic Speech Recognition*

**Aalto University School of Science,**  
Department of Information and Computer Science,  
Espoo, Finland

*Licentiate of Science (Technology)* September 2007 to September 2012

- Research Field: *Computer and Information Science*
- Thesis: *Finnish Language Speech Recognition for Dental Health Care*

**Helsinki University of Technology,**  
Department of Computer Science and Engineering,  
Espoo, Finland

*Master of Science (Technology)* September 1999 to August 2006

- Major: *Interactive Digital Media*
- Minor: *Telecommunications Software*
- Extended curriculum in mathematics and physics
- Thesis: *Image-based Detection of Defective Logs*

## VISITS

**International Computer Science Institute,**  
Berkeley, USA

|                            |                              |
|----------------------------|------------------------------|
| <i>Visiting Researcher</i> | February 2012 to August 2012 |
|----------------------------|------------------------------|

- Worked on speech recognition for conversational speech.

**Asian Institute of Technology School of Engineering and Technology,**  
Information and Communications Group,  
Pathumthani, Thailand

*Exchange Student* August 2005 to December 2005

WORK HISTORY **Groke Technologies,**  
Turku, Finland

*Machine Learning Scientist*

October 2020 to present

- Developed custom CNN models for the Groke Pro situational awareness system (PyTorch).
- Optimized data pipelines for multi-GPU training on millions of images (LitData, TorchData).
- Developed Kubeflow pipelines for training and testing computer vision models.
- Pretrained and fine-tuned models in the Google Cloud Platform and in SLURM compute clusters.
- Contributed PyTorch code to open source repositories.

**Nuance Communications,**  
Aachen, Germany

*Senior Research Scientist*

December 2017 to September 2020

*NLP/Machine and Deep Learning*

- Developed Transformer sequence-to-sequence models for the Nuance DAX report generation system (TensorFlow, PyTorch).
- Ran experiments in multi-GPU SGE and SLURM compute clusters.
- Contributed to public GitHub repositories and published results in conferences.

**Aalto University,**  
Espoo, Finland

*Doctoral Candidate*

January 2011 to November 2017

- Worked on subword, class, and neural network language models.
- Developed [AaltoASR](#) decoder and server backend (C++).
- Developed the [TheanoLM](#) toolkit for training large-vocabulary RNN language models for speech recognition (Theano).
- Collected a conversational Finnish text corpus from the Internet using data selection algorithms.
- Supervised collection of an acoustic training corpus ([DSPCON](#)).
- Experimented with language modeling and automatic speech recognition in SLURM compute clusters.
- Published results in scientific conferences.

**Genera Oy,** Helsinki, Finland

*Software Designer*

May 2001 to January 2012

- Implemented new graphical features to display panel software (C++).
- Designed and developed a distributed system for updating content to KONE InfoScreen elevator displays (C++, PHP, JavaScript).
- Developed image analysis algorithms and designed computer vision systems for timber grading and internal quality control (C++).
- Developed Mitla software for timber measurement and refining (Visual Basic).
- Developed configuration script parsers for control and diagnostics panels (Perl).

**PROGRAMMING EXPERTISE** I'm working daily with Python and I have written a lot of C++ in the past. I've used low-level math libraries such as PyTorch, TensorFlow, Theano, and NumPy extensively for modeling various tasks with neural networks. I have a long history of software development, mainly with C++, but I've used a myriad of programming languages ranging from assembly languages to Java. I have experience in parallel programming, GPUs, and network programming.

**SPOKEN LANGUAGES** Finnish (native), English (excellent written and spoken), German (fluent written and fair spoken), Swedish (fair written)

**OPEN-SOURCE CONTRIBUTIONS**

**TheanoLM**  
 Author of the open source toolkit for language modeling using neural networks.

**AaltoASR**  
 Contributed to Aalto University speech recognizer.

**Tensor2Tensor**  
 Contributed to the library of deep learning models from the Google Brain team.

**Fairseq**  
 Contributed [an implementation of the Transformer model with a pointer-generator network](#) to the sequence modeling toolkit from Facebook AI Research.

## **PyTorch Lightning Bolts**

Contributed [an implementation](#) of various versions of the YOLO object detection [model](#) to the repository of PyTorch Lightning models.
