GENERAL INTERESTS

I've worked on various machine learning tasks and software projects for 25 years. During the last ten years I have applied deep learning to various tasks—computer vision, language modeling, and text summarization. I'm excited about the emerging applications of deep learning and want to stay on top of the research field. My work involves both running experiments and implementing code for training models. I'm keen to write aesthetic, maintainable code, and I'm motivated by contributing to open source projects. I've also authored several publications.

EDUCATION

Aalto University School of Electrical Engineering,
Department of Signal Processing and Acoustics,
Espoo, Finland

Doctor of Science (Technology) September 2012 to May 2018

- Research Field: *Speech and Language Technology*
- Thesis: *Modeling Conversational Finnish for Automatic Speech Recognition*

Aalto University School of Science,
Department of Information and Computer Science,
Espoo, Finland

Licentiate of Science (Technology) September 2007 to September 2012

- Research Field: *Computer and Information Science*
- Thesis: *Finnish Language Speech Recognition for Dental Health Care*

Helsinki University of Technology,
Department of Computer Science and Engineering,
Espoo, Finland

Master of Science (Technology) September 1999 to August 2006

- Major: *Interactive Digital Media*
- Minor: *Telecommunications Software*
- Extended curriculum in mathematics and physics
- Thesis: *Image-based Detection of Defective Logs*

VISITS

International Computer Science Institute,
Berkeley, USA

<i>Visiting Researcher</i>	February 2012 to August 2012
----------------------------	------------------------------

- Worked on speech recognition for conversational speech.

Asian Institute of Technology School of Engineering and Technology,
Information and Communications Group,
Pathumthani, Thailand

<i>Exchange Student</i>	August 2005 to December 2005
-------------------------	------------------------------

WORK HISTORY

Groke Technologies,
Turku, Finland

Machine Learning Scientist October 2020 to present

- Developing and training computer vision models for the Groke Pro situation awareness system.

Nuance Communications,
Aachen, Germany

Senior Research Scientist
NLP/Machine and Deep Learning

December 2017 to September 2020

- Developing and training Transformer sequence-to-sequence models for the Nuance DAX report generation system.
- Publishing the results in a scientific conference.

Aalto University,
Espoo, Finland

Doctoral Candidate

January 2011 to November 2017

- Worked on subword, class, and neural network language models.
- Developed [AaltoASR](#) decoder and server backend (C++).
- Developed [TheanoLM](#) language modeling toolkit (Python).
- Collected a conversational Finnish text corpus from the Internet using data selection algorithms.
- Supervised collection of an acoustic training corpus ([DSPCON](#)).

Genera Oy, Helsinki, Finland

Software Designer

May 2001 to January 2012

- Implemented new graphical features to display panel software (C++).
- Designed and developed a distributed system for updating content to KONE InfoScreen elevator displays (C++, PHP, JavaScript).
- Developed image analysis algorithms and designed computer vision systems for timber grading and internal quality control (C++).
- Developed Mitla software for timber measurement and refining (Visual Basic).
- Developed configuration script parsers for control and diagnostics panels (Perl).

[A Novel Discriminative Method for Pruning Pronunciation Dictionary Entries](#)

In Proceedings of the 7th International Conference on Speech Technology and Human-Computer Dialogue (SpeD 2013)

PROGRAMMING EXPERTISE

I'm working daily with Python and I have written a lot of C++ in the past. I've used low-level math libraries such as PyTorch, TensorFlow, Theano, and NumPy extensively for modeling various tasks with neural networks. I have a long history of software development, mainly with C++, but I've used a myriad of programming languages ranging from assembly languages to Java. I've also gained some experience in concurrent programming and network programming.

SPOKEN LANGUAGES

Finnish (native), English (excellent written and spoken), German (fluent written and fair spoken), Swedish (fair written)

OPEN-SOURCE CONTRIBUTIONS

TheanoLM

Author of the open source toolkit for language modeling using neural networks.

AaltoASR

Contributed to Aalto University speech recognizer.

Tensor2Tensor

Contributed to the library of deep learning models from the Google Brain team.

Fairseq

Contributed [an implementation of the Transformer model with a pointer-generator network](#) to the sequence modeling toolkit from Facebook AI Research.

PyTorch Lightning Bolts

Contributed an implementation of various versions of the YOLO object detection model to the repository of PyTorch Lightning models.
